

*FSR has the solution for custom AV and Data Plates. The IPS connectivity family is in stock, priced competitively and works well in walls, under table and floor box applications.*

*The Wall plates are machined from 1/4" aircraft grade aluminum for a lifetime of service. Our plates are available from single gang up to 6 gangs and mix standard decora openings with IPS openings, an FSR exclusive.*

*The insert connectors are mounted to steel plates again insuring a lifetime of service. The inserts are available with no labeling, standard labeling or we will custom label them for you.*

*To make design work easier, visit our web site and try out the IPS Planner. It's a simple drag and drop tool for building wall plates and provides finished drawings as well as a bill of materials.*

*Additionally, our IPS inserts can be changed at any time for easy upgrade-ability.*

*All IPS wall plates and inserts carry a limited lifetime warranty.*
